

DOE Hydrogen Program Record		
Record: 24003	Date: May 1, 2024	
Title: Hydrogen Liquefaction Capacity in the United States		
Originator: Marika Wieliczko (DOE)		
Peer Reviewed by: Erin Lane (Plug Power), Al Burgunder (formerly Linde), Brian Bonner (Air Products), David Edwards (Air Liquide), Reid Larson (Chart Industries)		
Approved by: Ned Stetson (DOE), Sunita Satyapal (DOE)	Date: May 1, 2024	

Item

Existing and planned hydrogen liquefaction capacity in the United States total approximately 794 mtpd (metric tons per day) as of May 2024. Current total operating capacity is estimated as 304 mtpd from 14 plants with capacities of 5–32 mtpd. Additional capacity from 10–90 mtpd plants could total 490 mtpd, with 4 plants under construction and 9 plants in varying stages of planning and development. DOE continues to monitor projects that are in early development. Plant locations¹ are illustrated in Figure 1. As installations and announcements are continuously being updated, this Record only documents information available at the time of this posting (May 2024).

Figure 1. Existing and Planned Hydrogen Liquefaction Capacity in the U.S. as of May 2024²

¹ In some cases, the specific city within a state was not identified or publicly available.

² Bubbles are not drawn to scale and are for illustrative purposes only.

Table 1 lists the locations and capacities of current and anticipated hydrogen liquefaction plants. This is based on publicly available information and industry input, but is listed without attribution to any individual company or end user. Some locations include multiple liquefaction plants. This list does not include small-scale (<1 mtpd) liquefaction capabilities.

Table 1. Operational and Planned Hydrogen Liquefaction Plants in the U.S. as of May 2024

Location	Capacity (Short tpd)	Capacity (Metric tpd)	Status
New Orleans, LA	35	31.8	Operating
New Orleans, LA	35	31.8	Operating
Las Vegas, NV	33.1	30	Operating
McIntosh, AL	30	27.2	Operating
Ontario, CA	30	27.2	Operating
East Chicago, IN	30	27.2	Operating
