

Table of Contents

Introduction	1
Organization of the Report.....	2
Overview of the Hydrogen Program.....	2
Office Overviews and Updates	11
Introduction to the AMR Peer Review Process and Methodology... ..	19
Hydrogen Production Technologies – 2024	27
Subprogram Overview.....	27
Project Summaries	30
Project #ELY-BIL-001: Megawatt-Scale Low-Temperature Electrolyzer Research Capability	30
Project #P-148: HydroGEN Overview: A Consortium on Advanced Water-Splitting Materials.....	34
Project #P-170: Benchmarking Advanced Water-Splitting Technologies: Best Practices in Materials Characterization	41
Project #P-179: BioHydrogen (BioH ₂) Consortium to Advance Fermentative Hydrogen Production	44
Project #P-196: H ₂ NEW Consortium: Hydrogen from Next-Generation Electrolyzers of Water	50
Project #P-200: Low-Cost Manufacturing of High-Temperature Electrolysis Stacks	55
Project #P-202: Novel Microbial Electrolysis Cell Design for Efficient Hydrogen Generation from Wastewaters.....	58
Project #P-203: Novel Microbial Electrolysis System for Conversion of Biowastes into Low-Cost Renewable Hydrogen.....	62
Project #P-204: Hydrogen Production Cost and Performance Analysis	67
Project #P-205: Metal–Organic Framework-Based Heterostructure Electrocatalysts with Tailored Electron Density Distribution for Cost-Effective and Durable Fuel Cells and Electrolyzers.....	72
Project #P-206: Single-Walled Carbon Nanotubes with Confined Chalcogens as the Catalysts and Electrodes for Oxygen Reduction Reaction in Fuel Cells	77
Project #P-208: Non-Intermittent, Solar-Thermal Processing to Split Water Continuously via a Near-Isothermal, Pressure-Swing Redox Cycle	81
Project #P-209: Gallium-Nitride-Protected Tandem Photoelectrodes for High-Efficiency, Low-Cost, and Stable Solar Water Splitting	85
Project #P-211: Inverse Design of Perovskite Materials for Solar Thermochemical Water Splitting ...	91
Project #P-212: Ca-Ce-Ti-Mn-O-Based Perovskites for Two-Step Solar Thermochemical Hydrogen Production Cycles	95
Project #P-213: >200 cm ² Type 3 Photoelectrochemical Water-Splitting Prototype Using Bandgap-Tunable Perovskite Tandem and Molecular-Scale Designer Coatings	99

Project #P-214: Demonstration of a Robust, Compact Photoelectrochemical Hydrogen Generator	104
Project #P-215: Semi-Monolithic Devices for Photoelectrochemical Hydrogen Production	108
Project #P-216: Scalable Halide Perovskite Photoelectrochemical Cell Modules with 20% Solar-to-Hydrogen Efficiency and 1,000 Hours of Diurnal Durability	114
Project #P-217: Scalable Solar Fuel Production in a Reactor Train System by Thermochemical Redox Cycling of Novel Nonstoichiometric Perovskites	119
Project #P-218: All-Perovskite Tandem Photoelectrodes for Low-Cost Solar Hydrogen Fuel Production from Water Splitting	123
Hydrogen Infrastructure Technologies – 2024	128
Subprogram Overview.....	128
Project Summaries	131
Project #H2-041: H2@Scale Cooperative Research and Development Agreement: California Research Consortium (Reference Station, Fueling Performance Test Device, Station Cap Model)	131
Project #IN-001a: Hydrogen Materials Compatibility Consortium (H-Mat) Overview: Metals	136
Project #IN-001b: Hydrogen Materials Compatibility Consortium (H-Mat) Overview: Polymers....	142
Project #IN-015: Optimizing the Heisenberg Vortex Tube for Hydrogen Cooling	147
Project #IN-019: Ultra-Cryopump for High-Demand Transportation Fueling	151
Project #IN-025: Hydrogen Delivery Technologies Analysis	154
Project #IN-034: HyBlend: Pipeline Cooperative Research and Development Agreement (CRADA) Cost and Emissions Analysis	158
Project #IN-035: HyBlend: Pipeline Cooperative Research and Development Agreement (CRADA) Materials Research and Development.....	162
Project #IN-036: Cost-Effective Pre-Cooling for High-Flow Hydrogen Fueling.....	166
Project #IN-039: Analytic Framework for Optimal Sizing of Hydrogen Fueling Stations for Heavy-Duty Vehicles at Ports	171
Project #IN-040: The HyRIGHT Project: 700 bar Hydrogen Refueling Interface for Gaseous Heavy-Duty Trucks	175
Project #IN-043: Detection System Comprising Inexpensive Printed Sensor Arrays for Hydrogen Gas Emission Monitoring and Reporting	180
Project #ST-001: System-Level Analysis of Hydrogen Storage Options	184
Project #ST-127: Hydrogen Materials Advanced Research Consortium (HyMARC) Overview....	188
Project #ST-209: Hydrogen Materials Advanced Research Consortium (HyMARC) Seedling: Theory-Guided Design and Discovery of Materials for Reversible Methane and Hydrogen Storage.....	194
Project #ST-212: Hydrogen Materials Advanced Research Consortium (HyMARC) Seedling: Methane and Hydrogen Storage with Porous Cage-Based Composite Materials.....	198
Project #ST-217: Hydrogen Materials Advanced Research Consortium (HyMARC) Seedling: A Reversible Liquid Hydrogen Carrier System Based on Ammonium Formate and Captured Carbon Dioxide.....	202

Project #ST-218: Hydrogen Materials Advanced Research Consortium (HyMARC) Seedling: High-Capacity Step-Shaped Hydrogen Adsorption in Robust, Pore-Gating Zeolitic Imidazolate Frameworks.....	206
Project #ST-234: Development of Magnesium Borane Containing Solutions of Furans and Pyrroles as Reversible Liquid Hydrogen Carriers	210
Project #ST-235: Hydrogen Storage Cost and Performance Analysis.....	214
Project #ST-237: Carbon Composite Optimization Reducing Tank Cost.....	217
Project #ST-241: First Demonstration of a Commercial-Scale Liquid Hydrogen Storage Tank Design for International Trade Applications	220
Project #ST-242: Dimethyl Ether as a Renewable Hydrogen Carrier: Innovative Approach to Renewable Hydrogen Production	223
Project #ST-243: Fuel Additives for Solid Hydrogen (FLASH) Carriers for Electric Aviation	227
Fuel Cell Technologies – 2024	231
Subprogram Overview.....	231
Project Summaries	234
Project #FC-160: ElectroCat 2.0 (Electrocatalysis Consortium).....	234
Project #FC-336: A Systematic Approach to Developing Durable, Conductive Membranes for Operation at 120°C	244
Project #FC-337: Cummins Proton Exchange Membrane Fuel Cell System for Heavy-Duty Applications.....	251
Project #FC-338: Domestically Manufactured Fuel Cells for Heavy-Duty Applications	259
Project #FC-339: M2FCT: Million Mile Fuel Cell Truck Consortium.....	266
Project #FC-344: Low-Cost Corrosion-Resistant Coated Aluminum Bipolar Plates by Elevated Temperature Formation and Diffusion Bonding	271
Project #FC-345: Development and Manufacturing for Precious-Metal-Free Metal Bipolar Plate Coatings for Proton Exchange Membrane Fuel Cells.....	277
Project #FC-346: Fully Unitized Fuel Cell Manufactured by a Continuous Process	283
Project #FC-347: Development of Low-Cost, Thin Flexible Graphite Bipolar Plates for Heavy-Duty Fuel Cell Applications.....	290
Project #FC-348: Fuel Cell Bipolar Plate Technology Development for Heavy-Duty Applications	296
Project #FC-349: Foil-Bearing-Supported Compressor–Expander	301
Project #FC-350: High-Efficiency and Transient Air Systems for Affordable Load-Following Heavy-Duty Truck Fuel Cells.....	306
Project #FC-351: Durable and Efficient Centrifugal Compressor-Based Filtered Air Management System and Optimized Balance of Plant.....	312
Project #FC-352: Leveraging Internal Combustion Engine Air System Technology for Fuel Cell System Cost Reduction.....	317
Project #FC-353: Fuel Cell Cost and Performance Analysis.....	322
Project #FC-354: L’Innovator Program.....	330
Project #FC-363: Advanced Fuel Cell Vehicle DC-DC Converter Development	336

Project #MNF-BIL-001: R2R: Roll-to-Roll Consortium 341

Systems Development and Integration – 2024..... 349

Subprogram Overview..... 349

Project Summaries 353

Project #SDI-001: Integrated Modeling, Techno-Economic Analysis, and Reference Design for Renewable Hydrogen to Green Steel and Ammonia – Greenheart..... 353

Project #SDI-002: Hydrogen Microgrid in Underserved Communities 357

Project #SDI-006: High-Temperature Electrolyzer Megawatt-Scale Test Facility..... 361

Project #TA-001: Membrane Electrode Assembly Manufacturing Research and Development.... 366

Project #TA-016: Fuel Cell Hybrid Electric Delivery Van..... 371

Project #TA-018: High-Temperature Electrolysis, Stack, and Systems Testing 376

Project #TA-029: Autonomous Hydrogen Fueling Station..... 381

Project #TA-030: Demonstration of Integrated Hydrogen Production and Consumption for Improved Utility Operations 385

Project #TA-037: Demonstration and Framework for H2@Scale in Texas and Beyond 390

Project #TA-039: Solid Oxide Electrolysis System Demonstration 395

Project #TA-044: System Demonstration for Supplying Clean, Reliable, and Affordable Electric Power to Data Centers Using Hydrogen Fuel..... 400

Project #TA-048: Advanced Research on Integrated Energy Systems (ARIES)/Flatirons Facility – Hydrogen System Capability Buildout..... 406

Project #TA-052: Solid Oxide Electrolysis Cells Integrated with Direct Reduced Iron Plants for Producing Green Steel..... 411

Project #TA-053: Grid-Interactive Steelmaking with Hydrogen (GISH)..... 416

Project #TA-056: Ultra-Efficient Long-Haul Hydrogen Fuel Cell Tractor 420

Project #TA-057: High-Efficiency Fuel Cell Application for Medium-Duty Truck Vocations 425

Project #TA-058: Freight Emissions Reduction via Medium-Duty Battery Electric and Hydrogen Fuel Cell Trucks with Green Hydrogen Production via a New Electrolyzer Design and Electrical Utility Grid Coupling 431

Project #TA-059: Identifying Medium- and Heavy-Duty Applications for Fuel Cell Electric Trucks 435

Project #TA-060: Offshore Wind to Hydrogen – Modeling, Analysis, Testing, and International Collaboration Work..... 442

Project #TA-062: Validation of Interconnection and Interoperability of Grid-Forming Inverters Sourced by Hydrogen Technologies in View of 100% Renewable Microgrids 445

Project #TA-063: High-Efficacy Validation of Hydride Mega Tanks at the ARIES Lab (HEVHY METAL) 450

Project #TA-064: Hydrogen Production, Grid Integration, and Scaling for the Future 455

Project #TA-065: Total Cost of Ownership Analysis of Hydrogen Fuel Cells in Off-Road Heavy-Duty Applications – Preliminary Results..... 459

Analysis, Codes and Standards – 2024 464

 Subprogram Overview..... 464

 Project Summaries 468

 Project #SA-178: Cradle-to-Grave Transportation Analysis 468

 Project #SA-181: Global Change Analysis Model Expansion – Hydrogen Pathways..... 471

 Project #SA-187: Heavy-Duty Hydrogen Fueling Station Corridors 474

 Project #SA-188: Sustainability Criteria for Hydrogen Deployments 478

 Project #SCS-001: Component Failure Research and Development 482

 Project #SCS-005: Research and Development for Safety, Codes and Standards: Material and Component Compatibility 486

 Project #SCS-010: Research and Development for Safety, Codes and Standards: Hydrogen Behavior 490

 Project #SCS-011: Hydrogen Quantitative Risk Assessment 495

 Project #SCS-019: Hydrogen Safety Panel, Safety Knowledge Tools, and First Responder Training Resources 499

 Project #SCS-021: National Renewable Energy Laboratory Hydrogen Sensor Testing Laboratory 503

 Project #SCS-022: Fuel Cell and Hydrogen Energy Association Codes and Standards Support . 507

 Project #SCS-028: Hydrogen Education for a Decarbonized Global Economy (H2EDGE)..... 512

 Project #SCS-030: MC Formula Protocol for H35HF Fueling 516

 Project #SCS-031: Assessment of Heavy-Duty Fueling Methods and Components 520

 Project #SCS-032: Smart Hydrogen Wide-Area Monitoring for Outdoor H2@Scale Demonstration Sites and Enclosure 525

 Project #SCS-033: Risk Assessments of Design and Refueling for Hydrogen Locomotive and Tender 531

 Project #SCS-034: Large-Scale Hydrogen Storage – Risk Assessment Seattle City Light and Port of Seattle 536

 Project #SCS-035: Modeling and Risk Assessment of Hydrogen–Natural-Gas Blends 540

 Project #SCS-036: Electrical Hydrogen Sensor Technology with a Sub-Minute Response Time and a Part-Per-Billion Detection Limit for Hydrogen Environmental Monitoring 544

 Project #SCS-037: Sensing Hydrogen Losses at One-Part-Per-Billion Level for Hydrogen-Blending Natural Gas Pipelines 550

Appendix A. 2024 Hydrogen Program Review Summary 555

Appendix B. 2024 Hydrogen Program Annual Merit Review and Peer Evaluation Meeting Attendee List 583

Appendix C. Evaluation Forms 617

Appendix D. List of Projects Presented but Not Reviewed632

Appendix E. Funding Opportunity Announcement and Selections – Examples.....646
